企業版

## Green pass

- Possessing functions of both **individual identification** and **digital green pass** allow employee to have access to personal test report anytime. Even more important, users will be kindly reminded to do periodic test by App.

## Statistical analysis

- **Providing instant data of test result** for EHS (Environmental, health and Safety) of company can better assist enterprise to do **statistical analysis** and establish a forward-looking network of COVID-19 rapid self-tests.

## Access control

- Enterprise can do better **access control management** based on each Covid-19 test result of employee recorded on App.

## Positive cases Tracking

- Assist enterprise to report **the footprint of positive cases** to local health authority and alert employee with positive reaction to go to the hospital for PCR test urgently.
- Exposure notification will be sent from Ainos app, if users 've been exposed to people who had a positive Ainos antigen test result.
- Show the dates overlap with the footprint of positive cases who are also users of Ainos app.
